To

The Secretary to Government,
Finance Department,
Bangalore

Sir,

I have the honour to forward herewith a report dated 21st February 1948 from Shri [illegible], Engineer Officer, attached to the Board requesting for the necessary sanction for the deputation of the Engineer Officer for a period of about 10 days to study the working conditions of the Soil Cement Block making machines of various types manufactured in Soil Cement blocks of various sizes required for certain buildings proposed to be constructed by the Board and to consult the Designers as to how the machinery could be suitably adjusted for manufacturing the soil cement blocks as required.

2. The approximate cost for the deputation including travelling allowance is Rs. 250/-

3. As the question of construction of certain labour houses on a large scale in Bangalore City is under the active consideration of Government, it would be of great advantage to enable the Engineer Officer to obtain necessary assistance required to study the working of the machinery proposed to be purchased for the purpose and also to enable him to consult the Designers as to the identification and other details about the working of the machinery.

4. I therefore request that sanction of Government may kindly be obtained to the deputation of Shri [illegible], Engineer Officer for a period of 10 days for the purpose.

Yours faithfully,

[illegible]

Secretary

21 FEB 1949
BANGALORE

Sir,

Re Deputation of Engineer Officer to Bombay

I have the honour to inform you that it is proposed to purchase Soil-Cement-Block-making Machinery of vibrating type for manufacturing ~~the~~ soil cement blocks on a very large scale with maximum speed and thus ~~to~~ reduce the cost of the material and construction It is also proposed to buy Pneumatic Concretor for spraying the walls inside with cement instead of the laborious task of cement pointing and thus ~~incidentally~~ incidentally minimise the expenditure

Accts 21 2 49

These machineries are used for manufacturing the hollow-cement-blocks and are working in Bombay It is necessary to inspect them during action to find out how they could be adopted for making soil-cement-blocks and study all details of working regarding ~~the~~ mass production The designer must also be consulted how the machinery could be suitably adjusted for manufacturing the soil-cement-blocks we require for the construction

Hence, it is suggested that I may be deputed to Bombay for a period of 7 or 10 days for the above purpose The expenditure can be met out of the provision made under contingencies and other unforseen works for which a provision of Rs 46,000/- has been made in the detailed estimate submitted to Government

Yours faithfully,
Rajagopalan
